# Security Solutions from Star Communications

A security system from Star can keep you close to what matters most. You can view system status, monitor activity at your property, watch live and recorded video, arm and disarm your system, set up user codes, and even control your lights and thermostats—all from easy-to-use web and mobile interfaces.

## ABOUT US

Star Communications, a leader in the area of telecommunications for over 50 years in eastern North Carolina, is now your trusted source for security and surveillance.

Star Communications has over 10 years in combined experience with security and surveillance systems. All of our security services and equipment are installed by trained and certified Star employees. You can rest assured knowing that a trusted name and a friendly face will be there from the estimate through the installation.

## SECURITY OPTIONS

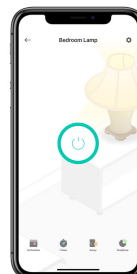

### Wireless Alarm Monitoring

We have a wide range of wireless monitoring alarm solutions. Powered by the top names in alarm and monitoring, we are able to deliver a state of the art system for your home or business that's easy to use and manage.

### Total Connect Monitoring

Wouldn't it be nice to adjust your lights, view your cameras, check your door locks or increase your thermostat's temperature all from your phone? Now you can with Total Connect Monitoring. With Total Connect no matter where you are you'll always be in control.

### Video Security Monitoring

Want to see if the kids got in from school okay? Maybe you're waiting on an important delivery? With video cameras from Star Communications you can use your phone or mobile device to check in on your home or business and see what's going on no matter where you are. View live streaming video on multiple cameras so you can always have an eye on what's important.

### Star Alert Monitoring

Keep your loved one's independence and know they are safe at home with Star Alert Personal Monitoring. At the touch of a button, a call for help can be made at any sign of distress or medical emergency.
