### Why Fiber Internet Makes a Difference

Fiber Internet uses light signals to deliver data, which means faster speeds, more reliable connections, and better performance for everything you do online. Whether you're working from home, streaming your favorite shows, gaming, or managing a smart home, fiber helps everything run smoothly.

Unlike older technologies, fiber isn't as affected by distance or heavy usage times. That means you're less likely to experience slowdowns during peak hours when everyone is online.

At STAR, we're proud to provide a fiber network built for today's needs, and tomorrow's growth. It's all about giving our community the speed and reliability you can count on.

### NEW Kelly CO

Our new Kelly Central Office will deliver multi gig Internet, phone, and video services, with backup power in place to keep you connected even during outages.

Switching to online-only / paperless billing means fewer paper bills, fewer trips to the mailbox, and a more environmentally friendly way to manage your Star account.

## The Dish Drop – Traditional Mexican Guacamole

Recipe from [www.allrecipes.com](http://www.allrecipes.com)

### Ingredients:

- 2 avocados, peeled and pitted
- 1 cup chopped tomatoes
- ¼ cup chopped onion
- ¼ cup chopped cilantro
- 2 tbsp lemon juice
- 1 jalapeño, seeded and minced
- Salt and pepper

### Instructions:

1. Mash avocados in a bowl until creamy.
2. Mix tomatoes, onion, cilantro, lemon juice, and jalapeño pepper into mashed avocado until well combined. Season with salt and pepper

## On This Date in History

**May 18, 1980:** Mount St. Helens erupted in Washington State.

**May 21, 2000:** GPS technology became available for public use, making navigation easier for everyday drivers and travelers.

## Cyber Safety Tip

**Create strong passwords** using a mix of letters, numbers, and symbols. Avoid using personal information like birthdays or names.

## Managed Wi-Fi: Better Coverage, Less Stress

Having fast Internet is important, but having strong Wi-Fi throughout your home matters just as much. Managed Wi-Fi takes the guesswork out of your home network. Instead of dealing with dead zones, buffering, or slow connections in certain rooms, our team ensures your Wi-Fi is optimized for full coverage and performance.

With Managed Wi-Fi from STAR, you get:

- Consistent coverage throughout your home
- Support from a local team you can trust
- Easy-to-use controls for managing your network
